ACQUIRED SKILLS

- The DEIPM Master's degree aims to provide students with **the necessary skills in project management and economic expertise**. While **the M1 programme provides fundamental knowledge of economics**, mainly international and development economics, **the M2 program enables students to deepen their knowledge of economics and international project management techniques**.
- The aim of this Master's degree is to **prepare executives who wish to work as project managers or economic experts in international organisations or national public agencies working in the field of aid to emerging or developing countries, NGOs, multinational companies or consultancies**

BENEFITS OF THE TRAINING

- The courses are entirely taught in English, and draw on both economics and management**
- Input from representatives of the socio-professional world involved in the course**, working in international project management and economic analysis of developing countries
- Professional pathway:** with an internship followed by a dissertation
- Research pathway:** with a research dissertation under closer supervision, leading to the possibility of a PhD: possibility to benefit from a grant for an internship in the Erudite unit research
- Field assignments** to apply the skills acquired in project management
- Co-operation agreement** to attend a series of conferences organised by the World Bank

ORGANISATION

- The M1 'International Economics Studies' is taught in UPEC**
- For the M2**, two tracks exist: **'Project Management and Impact Evaluation' taught mainly at Gustave Eiffel University** and **'Project Management and Sustainable Development' taught at UPEC**

ENTRY REQUIREMENTS

- The Master's programme is open to **graduates of business schools, engineering schools, IEP or other M1 programmes who can demonstrate a sufficient level of knowledge in economics and management**

AFTER THE TRAINING

- The Master 2 Development Economics and International Project Management leads to **jobs as economic experts, consultants or project managers in international organisations, national public agencies, NGOs working in developing countries, multinational companies or consultancies**
- It also enables students **to complete a PhD thesis at the University** (provided they have taken the research dissertation option in M2 and completed a research placement at the Gustave Eiffel University or UPEC)

PROJECT MANAGEMENT AND IMPACT EVALUATION TRACK PROGRAM (M2)
